March 9, 1972

Mr. Edward L. Cyr  
Engineer in charge  
Bureau of Traffic and Signals  
City Hall  
Newark, New Jersey 07102

Re: Letter of August 13, 1970

Dear Mr. Cyr:

As per the enclosed copies of our correspondings, you can readily see why my letter is one of dismay.

You sent one of your representatives to my home to confirm the problem we are having on our block, and nothing has been done since that time.

We are now again requesting that the law be just. We are indeed in need of those signs. As was stated in our letter to the department of Public Works, I contend the reason for the sewers clogging is not because the pipe lines are too small, but the amount of dirt that is being washed down the sewers so great.

Have you ever walked along the streets of Bergen. From corner to corner the sewers are jammed up with paper, dirt and the like. If those sewers were cleaned within the same week and not one a month if that could be done, regardless of the type of equipment used, it might help the problem.

I may sound ignorant, but I contend that common sense is the back bone of reality.

Sincerely,

*Ann Groves*

Ann Groves (Mrs.)  
Community Committee Woman

cc:

1. Clogged Sewers - New Renner Ave
2. No Motor broom on Renner Ave
3. 25 MPH signs as promised
4. Alternate side of street Parking sign as promised
